# Version 11.5.1

Release Notes · https://support.ontimesuite.com/docs/release-notes-otdom/version-11-5-1/

## Whats New?

### Desktop

- The Exchange Permissions for Hybrid users now support "View Schedule Information" in addition to "Create, Edit, and Delete entries" and "Read entry details.
- When individual mode is selected, the name of the currently selected OnTime user now appears in the horizontal navigation bar. This is useful when the user selection area is not in focus.

### Config

- The Exchange Permissions for Hybrid users now support "View Schedule Information" in addition to "Create, Edit, and Delete entries" and "Read entry details.

### Exchange Servlet

- The Exchange Permissions for Hybrid users now support "View Schedule Information" in addition to "Create, Edit, and Delete entries" and "Read entry details.

## Bug Fixes

### Desktop

- Fixed an issue where a single day vacation request initially appeared as two day requests.
- Fixed an issue where, if user preferences were set to "Last Group" and "-Show all" was selected, the application failed to load all users during startup.

## Connections

- Fixed an issue where it was not possible to remove a profile image from Connections.

## Config

- Fixed an issue where "Reserved For" was not visible in Global Settings when permissions were set to "View Schedule Only."
