Version 11.7.2

Release Notes · https://support.ontimesuite.com/docs/release-notes-otdom/version-11-7-2/

What’s New?

Desktop

- Added text wrapping support for comments in Share My Time requests, ensuring full visibility of longer text entries.

Main Servlet

- Events pushed via Event Hub are now marked as "No Edit," preventing modifications from within the OnTime client. This ensures consistency and preserves the integrity of centrally managed events.

Bug Fixes

Events

- Users with Reader access were able to drag and create new events and use the "Add me to Event" option.

Main Servlet

- Deleting a pushed Event Hub event from the desktop calendar could prevent the event from being re-created during subsequent Event Hub syncs. This issue has now been corrected.
- Previously, if a pushed event was later modified, the changes were not reflected in users' calendars during the Event Hub sync. This issue has now been resolved, ensuring updates to pushed events are correctly synchronized.
- The Event Hub limitation using Include and Exclude for event push was not active in previous versions.
