Version 6.3.12

Release Notes · https://support.ontimesuite.com/docs/release-notes-otms/version-6-3-12/

Supersedes version 6.3.11, as that release contained a build issue which caused a required Desktop fix to be missing.

What’s New?

Backend

- Upgraded Tomcat to version 10.1.52.
- Autodiscover redirection handling corrected. Fixed a rare issue with Autodiscover redirection that has been seen for some customers in the Japanese data centers.

Supersedes version 6.3.11, as that release contained a build issue which caused a required Desktop fix to be missing.

Bug Fixes

Desktop

- Resolved error when opening invitations with read-only access. Fixed an issue where users with read-only rights encountered an error when opening an invitation..

Backend

- Resolved a regression that caused an error when performing batch printing.
