Version 6.3.14

Release Notes · https://support.ontimesuite.com/docs/release-notes-otms/version-6-3-14/

What’s New?

Backend

- Improved the Details call via EWS (Exchange Web Services) to prevent unnecessary permission errors when retrieving calendar entry details.

Bug Fixes

Desktop

- Fixed an issue where searching for a room with a capacity of 0 did not return correct results. Rooms configured with zero capacity can now be found as expected during search.
