Version 6.3.4

Release Notes · https://support.ontimesuite.com/docs/release-notes-otms/version-6-3-4/

What’s New?

Desktop

- 0 min meetings now showing in viewer (all events have a min. 2 px width)

Teams

- The Add-in's now upgrades the existing manifest instead of requiring a new installation during updates.
- **Microsoft changes affecting shared channels**
  Microsoft is currently making changes to how apps can work in shared channels. Due to these changes, it is at the moment not possible or supported to install the OnTime app in a shared channel. Private and standard channels are not affected and continue to work as expected.

Install

- The Add-in's now upgrades the existing manifest instead of requiring a new installation during updates.

Bug Fixes

Desktop

- Added validation to prevent creating personal groups with a name ending in a backslash.
