Version 6.3.9

Release Notes · https://support.ontimesuite.com/docs/release-notes-otms/version-6-3-9/

What’s New?

Backend

- When a room’s capacity in Exchange is set to 0 or left blank, you can now edit the capacity directly in the OnTime Admin client.
- Upgraded Tomcat to version 10.1.49.

Bug Fixes

Backend

- Fixed an issue where updates to a room’s capacity in Exchange were not synced if capacity was the only property that changed.
- Fixed an issue where searching for free rooms using Tags returned incorrect results.
- Fixed an issue where Tags were sometimes not editable in the OnTime Admin client, even when they were empty in Exchange.
