Version 3.0.6

Release Notes · https://support.ontimesuite.com/docs/release-notes-otrd/version-3-0-6/

What’s New?

Security update

- Updated the bundled Node.js runtime to **v24.22.1**, which fixes **CVE-2026-111497**.
- **OnTime Room Display was not directly affected by this vulnerability.** We’re releasing this update because our policy is to keep the underlying platform current whenever a significant security issue is reported in Node.js.
- No functional changes and no configuration changes are needed.

  We recommend upgrading to 3.0.6 as part of your normal maintenance.
