Version 6.4.3

Release Notes · https://support.ontimesuite.com/docs/release-notes-otms/version-6-4-3/

What's New?

Install&Upgrade/Internal

- Apache MINA Security Update: Updated the Apache MINA mina-core library from version 2.2.4 to 2.2.9 to address security vulnerabilities CVE-2026-47065 and CVE-2026-47321 affecting earlier versions.

Bug Fixes

Backend

- Room and Resource Search Performance: Restored a database index that was unintentionally removed in version 6.4.2. This resolves severe performance issues during room and resource availability searches and prevents the server from becoming unresponsive under peak load.
