Version 3.0.0

Release Notes · https://support.ontimesuite.com/docs/release-notes-otrd/version-3-0-0/

What’s New?

The optional check-in feature

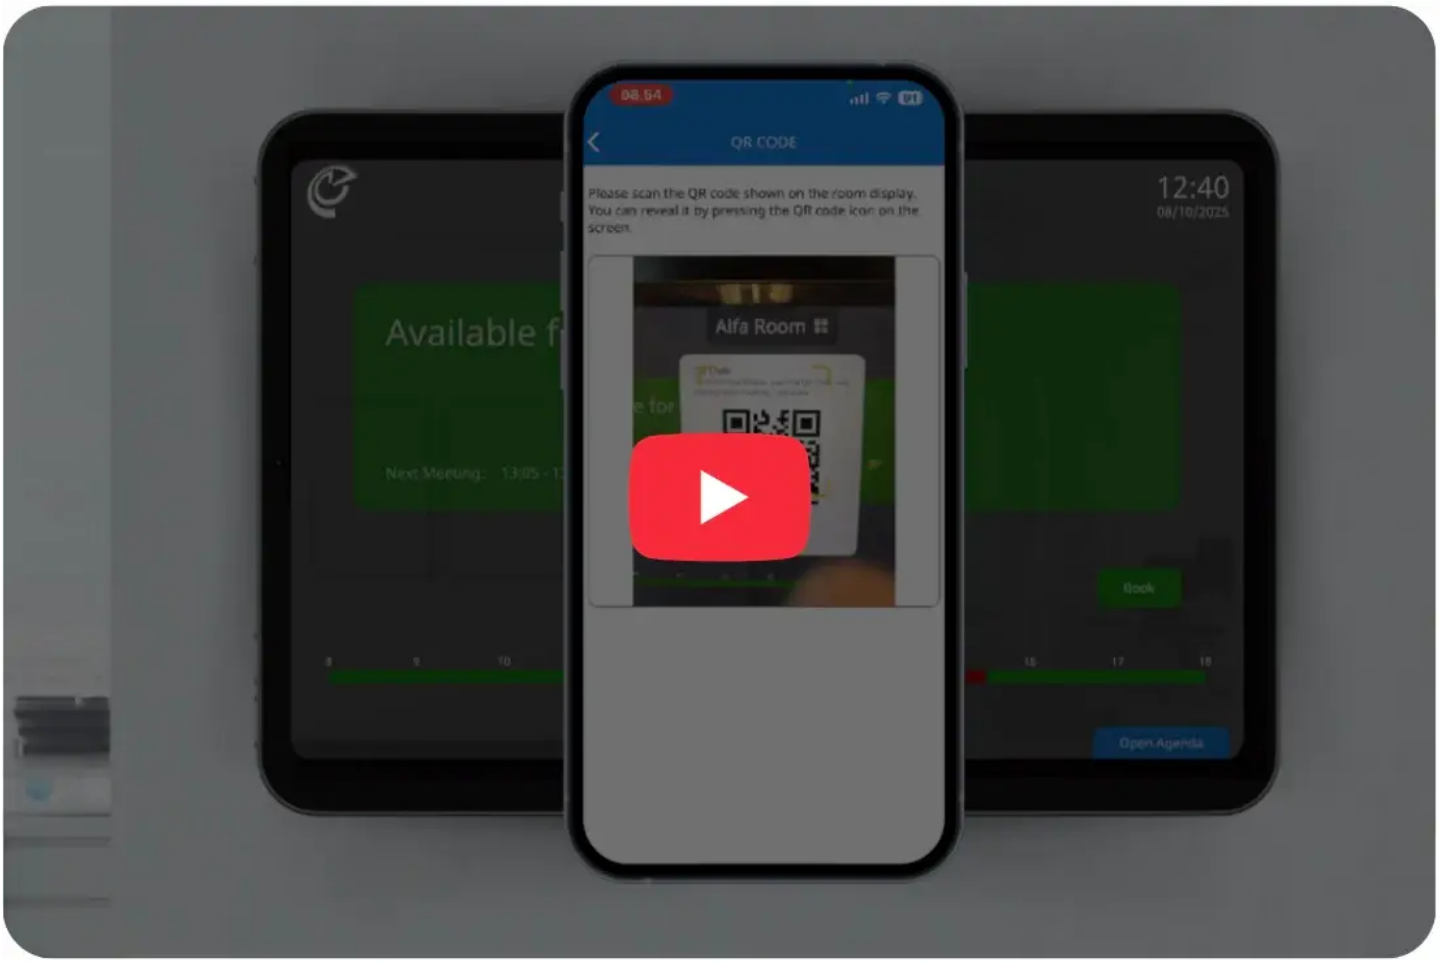

If no one checks in within the set timeframe, the room is automatically released - freeing it up for colleagues who actually need it. No more no-shows, just smarter use of your resources.

QR code functionality

We have added a QR code function on the displays allowing you to scan it with your OnTime mobile to go directly to that room to make a quick booking, reserve it for later, or add a meeting subject, offering even greater flexibility in how you manage your rooms.

Improved room overview in OnTime Mobile

The updated mobile client now works seamlessly with your room displays, providing a clearer overview of available and occupied meeting rooms and much more.
