Version 3.0.1

Release Notes · https://support.ontimesuite.com/docs/release-notes-otrd/version-3-0-1/

What’s New?

- If a room-only booking does not have a chairperson assigned, no email will be sent.
- To release or book a room from the display the RoomDisplay role must have editor access to the rooms.
- For Meetings the Room Display role must have read access to the user’s calendar for the Release button to appear.
- Changes to a meeting’s subject are now updated in Room Display when changed.
- The item cache is now cleared every hour to ensure that changes in access rights take effect.

Bug Fixes

- Fixed an issue where characters outside the Latin-1 charset (e.g., Japanese) were not supported in passwords. These characters are now fully supported.
- In the Admin UI, the Log view now automatically updates again.
- Fixed an issue where the date/time interval used when booking a room on the display did not respect the selected region settings.
- Fixed an issue where Book/Release actions failed when the user did not have sufficient access to the room.
