Version 3.0.5

Release Notes · https://support.ontimesuite.com/docs/release-notes-otrd/version-3-0-5/

What’s New?

- Updated the bundled Node.js runtime to version 24.16.0

Bug Fixes

- Room Display: Fixed an issue where the active status indicator (green dot) disappeared after sorting the Displays list. The indicator now remains visible after sorting.
- Fixed an issue in Domino where repeated room-only bookings were not removed after the reservation ended without check-in. The bookings are now correctly deleted from both the calendar and Room Display. (Domino only)
- Fixed an issue in Domino where repeated room-only bookings were not removed after the reservation ended without check-in. The bookings are now correctly deleted from both the calendar and Room Display. (Domino only)
- Fixed an issue where email notifications for bookings without a subject displayed the placeholder ${Subject} instead of leaving the subject blank. (Domino only).
- Room Display: Fixed an issue where a room booking cancellation email could be sent even though the booking had not actually been cancelled. The notification now correctly reflects the booking status. Also corrected the timezone information in the notification. (Exchange only)
- Fixed an issue where the Extend Your Booking and Release Room buttons in the OnTime Room Display mobile interface were not active, preventing users from extending or releasing room bookings. (Exchange only)
- Fixed an issue where the Check In button reappeared after the display was refreshed, even though the booking had already been checked in. (Exchange only)
